

“My goal is to thoroughly comprehend my clients’ needs, enabling me to successfully address the financial, physical and emotional stressors that often accompany the family building process. Providing uncompromising guidance and support, which surpasses their expectations, is truly rewarding.”

—Mindy Berkson

Mindy Berkson – Infertility Consultant

Mindy Berkson founded Lotus Blossom Consulting, LLC to arm consumers/patients with information and education to make the best medical choices pertaining to building a family. The consultancy was “born” from Mindy’s personal experience with infertility, and has blossomed through the strategic alliances she has cultivated from her deep seeded background in venture capital.

“My personal experience has helped me become the best advocate possible for each of my clients,” says Mindy. “That, along with my commitment to knowing as much about the current surrogacy climate as possible, gives us a tremendous advantage in terms of helping our clients achieve their family-building dreams.”

Mindy works with individuals and couples, taking into consideration her clients’ emotional, physical and financial infertility issues by orchestrating nationwide teams of multi disciplinary unbiased professionals to accomplish a treatment cycle. Most importantly, Mindy (having gone through the infertility process herself), provides an insider's approach to the challenging roadblocks that are often present in conquering infertility. Her national network of doctors, lawyers, and infertility clinics allow her and her team to create a solid master plan for building a family.

As an infertility expert, Mindy is often invited to participate in media opportunities and speaking engagements, both internationally and throughout the United States, to help audiences understand and explore the resources necessary to navigate the complicated issues surrounding surrogacy and/or egg donation. “Educating the media and consumers is an essential part of our mission,” she says.

Mindy is a three-year board member to Fertile Action, an organization to help promote fertility preservation for cancer patients. She is also on the major donor board of Human Rights Campaign, a national organization promoting LGBT rights and marriage equality, and is a member of the Women's President Organization Dallas, the world’s largest executive leadership organization.
